

Enrollment by Curriculum

About half of the students (49.1%) are enrolled in a program of study designed to prepare students for transfer to baccalaureate programs. Nearly eighteen percent (18.0%) of the students are enrolled in technical or career programs designed primarily to prepare students for immediate entry into occupations; however, students in these programs often do transfer to four-year institutions from these programs. This fall, 32.9% of the students have not indicated the program of study they are pursuing, or are not pursuing a degree or certificate.

The proportion of students in Transfer and Technical programs has increased in the last two fall semesters, thereby reversing the trend of having more students classified as Undecided / Non-degree.
