

130 WORKSHEET (3.2)

Name _____

1. MISSING PART (GROUP):

Example: I need 5 notebooks for school this year. I have 2 at home. How many will I have to purchase at the store?

Write a sample missing part (group) problem:

2. MISSING PART (MEASURE):

Example: I need to collect 5 gallons of water for my emergency supplies. I have collected 2 gallons. How many more do I need?

Write a sample missing part (measure) problem:

3. Classify the following problems using the terms from Section 3.2.

- A. I need 20 apples to make some pies. If I have 5 apples at home, how many do I need to buy at the market?

- B. I brought 10 apples to the picnic. If my friends and I ate 8 apples, how many do I have left?

- C. Jake has 5 rocks and Sue has 3 rocks. How many rocks do they have together?

- D. Laura earns \$5 for mowing her neighbor's lawn. She earns \$6 for washing her dad's car. How much money has she earned all together?
- E. Mable has 6 trees in her yard and John has 2. How many more trees does Mable have than John?
- F. Michelle has 3 yards of yarn. She uses two yards to knit a scarf. How much yarn does she have left?
- G. Grandma needs 10 quarts of strawberries to make jam. If she picked 6 quarts yesterday, how many more quarts does she need?
- H. There are 20 children in your class. If 16 children have returned their permission slips, how many more slips need to be returned?
