CREATION OF THE CRIMINAL JUSTICE AREA OF CONCENTRATION, ARTS AND SCIENCES ASSOCIATE OF ARTS PROGRAM

BACKGROUND

The 2017-2021 Maryland State Plan for Postsecondary Education states the goals of access, success, and innovation to support student success with less debt. Montgomery College echoes those goals by affirming its *Montgomery College 2020* Theme II strategy to provide affordable access for its communities and ensure student success and completion. Additionally, the Montgomery College Academic Master Plan (Initiative 5 - Enhance Student Pathways from MCPS to USG) strongly encourages collaborative degree pathways to enhance transferability to USG's campus.

In response to the increased educational needs of the criminal justice professions and the increased transfer needs of our students, Montgomery College has designed the new criminal justice area of concentration, arts and sciences associate of arts program. The curriculum is designed for students planning to transfer to a four-year institution to complete a bachelor's degree in criminal justice and/or criminology. A strong academic core exposes students to important criminal justice coursework while incorporating key general education courses needed for transfer. Many federal law enforcement and legal careers in the criminal justice field require a bachelor's degree as the basic educational standard of entry and require students to continue to a four-year institution or beyond to achieve their goals. The proposed program prepares MC students who plan to serve the community in the fields of law enforcement, corrections, juvenile justice, probation and parole, court services, or law.

The new criminal justice program will help fulfill the ever-increasing workforce needs of the many local and nationwide criminal justice agencies. The July 2019 edition of the Bureau of Labor Statistics Occupational Outlook Handbook predicts an 11 percent increase in detectives and investigators and a seven percent increase in police work over the next decade—an above average outlook for economic job growth and vitality in the criminal justice profession. A security-conscious society and high population contribute to the increasing demand for police services, and applicants with a bachelor's degree will have the best opportunity to fill these positions.

In addition to fulfilling workforce needs in the criminal justice field, the new criminal justice associate of arts will also facilitate transfer to institutions offering bachelor degrees. There are currently more than 100 criminal justice students identified under the general studies associate of arts: studies in social science, administration, and health area of concentration (SSAH core). Montgomery College has an active articulation agreement with the Department of Criminology and Criminal Justice at the University of Maryland College Park at the Universities at Shady Grove, and approximately 80 percent of the students entering the program are transfer students from Montgomery College. This program will facilitate an increased growth in articulations with other academic institutions as well.

In conclusion, the creation of the criminal justice area of concentration, arts and sciences associate of arts program will not create any additional expenses for the College. Outstanding

faculty, state-of-the-art facilities, equipment, and library resources are already in place as the courses are currently being offered in the criminal justice associate of applied sciences program. The program will be implemented with existing institutional resources.

RECOMMENDATION

It is recommended that the Board of Trustees approve the creation of the criminal justice area of concentration, arts and sciences associate of arts program and that an application for approval be submitted to the Maryland Higher Education Commission.

ACCEPTANCE OF THE 2019 PERFORMANCE ACCOUNTABILITY REPORT

BACKGROUND

The Performance Accountability Report (PAR) is the College's annual report on progress toward reaching benchmarks in key indicators of operations. The report is submitted to the Maryland Higher Education Commission (MHEC) each year. PAR indicators have universal statewide definitions.

This accountability reporting system has been in place since 1996, when it was implemented by MHEC. The reporting structure is based on requirements in the Maryland Higher Education Reorganization Act of 1988. At Montgomery College, the Office of Institutional Research and Effectiveness (OIRE) assumes the primary role for providing the quantitative content of the PAR and coordinating the contributions from administrative offices, individual campuses, and Workforce Development & Continuing Education.

In addition to narrative reporting on significant student characteristics and performance issues, community outreach efforts, use of public funding, and cost containment efforts, the report contains recent trend data on a number of specific quantitative indicators that reflect progress towards benchmarks set by the Board of Trustees on each indicator. MHEC considers the College's performance on these indicators as the primary component of assessing the institution's effectiveness, and, at the College, the president incorporates the PAR results in monitoring and assessing institutional performance on relevant internal dimensions, such as in the *Montgomery College 2020* "Performance Canvas."

Upon acceptance of the report by the Board of Trustees, the Performance Accountability Report will be submitted to the Maryland Higher Education Commission.

RECOMMENDATION

It is recommended that the Board of Trustees accept the 2019 Montgomery College Performance Accountability Report, and that the president be authorized to submit the report to the Maryland Higher Education Commission.
