Program Description
(R): 159A

This AA area of concentration provides the first two years of a teacher preparation program for the elementary and secondary grade levels.

This curriculum prepares students to transfer to four year institutions with a broad-based background in the study of human movement and education theory and psychology. This curriculum is based upon introducing students to the National Standards for Physical Education (NASPE) for entry level physical education teachers. The program allows the students to fulfill their general education requirements, participate in field work experience, as well as complete a core of professional preparation work that is appropriate for students in their first two years of the physical education major. Courses will address pedagogy, psychology, motor skill and movement abilities as well as health and fitness promotion.

Program Outcomes
Upon completion of this program a student will be able to:

- Identify historical, philosophical, and social perspectives of physical education issues and legislation.
- Analyze and correct elements of motor skills and performance concepts.
- Develop and implement appropriate (e.g. measureable, developmentally appropriate, performance-based) goals and objectives aligned with local, state, and/or national objectives.
- Design and implement content and assessments that are aligned with lesson objectives.
- Demonstrate knowledge of current technology by planning and implementing learning experiences that require students to appropriately use technology to meet lesson objectives.
- Implement effective demonstrations, explanations, and instructional cues and prompts to link physical activity concepts to appropriate learning experiences.

Program Advisors

- Prof. Lesley Wasilko, 240-567-7585, lesley.wasilko@montgomerycollege.edu
