

ELECTRICAL WIRING LETTER OF RECOGNITION: 807A

Total Credits: 8

Catalog Edition: 2021-2022

Program Description

(R): 807A

This sequence of two courses is designed for persons who wish to develop skills in the residential electrical trade. To complete each course in this sequence, students need to demonstrate skills in specific areas. These areas include: material and tool selection, calculations, switch and receptacle wiring, lighting, services and panels. A grade of C or better is required in each course.

Program Outcomes

Upon completion of this program a student will be able to:

- Demonstrate the ability to work effectively as a team member within the electrical trade.
- Describe effectively the roles and responsibilities of an electrician on a residential construction project.
- Apply practical electrical skills.
