

Password Cracking

Can you crack the password?

These exercises are intended for learning purposes only. You can use these to practice for upcoming NCL events.

Still need more help training?

You can do [NETLAB](#) NDG2 [OR](#) NDG3 and navigate to **Lab 05: Password Cracking with John the Ripper and Hashcat**

To go straight to the example syntax: Click the blue page button next to the lab > See the last line of the PDF:

```
hashcat -m 1800 -a 0 hashes3.txt /usr/share/john/password.lst
```

```
hashcat -m 1800 -a 0 hashes.txt /usr/share/wordlists/rockyou.txt (unzip the rockyou list.  
try: gzip -d yourfile.txt.gz)
```

Or launch the lab and practice the lab.
