

UNIVERSITY of MARYLAND
SCHOOL OF NURSING

DUAL-ADMISSION PARTNERSHIPS

RN-to-Bachelor of Science in Nursing

General Program Information

- The UMSON Dual-Admission Partnership RN-to-Bachelor of Science in Nursing (BSN) program is available to eligible students after admission into your Community College's nursing program.
- Admission into the Dual-Admission RN-to-BSN Partnership is competitive and requires an overall GPA of 3.0 or higher in all undergraduate courses and a minimum 2.75 science GPA (Anatomy and Physiology I and II, Microbiology, Chemistry).

Steps for Dual Enrollment

1. Meet with your Community College nursing advisor to determine eligibility. If eligible, they will connect you with the UMSON Advisor for application instructions and next steps.
2. The UMSON Advisor will reach out to you via email to set up an appointment to go over the specifics of the program: application process & requirements, next steps, and expectations.
3. After this appointment, you will complete the online application for the term you will matriculate to UMSON (the term after you complete your ADN).
4. After your application & materials have all been received, you will be conditionally admitted to the Dual Admission Program. *This is **NOT** admission to the school.*
5. After conditional admission to the Dual Admission Program, you will be eligible to take UMSON courses (after your first semester in your ADN program) if you met the application deadline (Spring -December 1 / Summer & Fall- May 1).
6. An email will be sent with instructions and deadlines.

Prior to Matriculation

You are not considered an admitted student until you complete the steps below:

1. You must remain in contact with your CC and UMSON advisors and respond to all correspondence.
2. Prior to formal admission to the RN-BSN program, you must provide official updated transcripts showing you have no more than four total courses in progress.
3. After receiving your formal letter of admission, you have 14 days to complete the two-step confirmation process, which includes submitting the confirmation form with the attached receipt of the \$400 non-refundable seat deposit.

The confirmation form and deposit is required of ALL students, regardless if you took previous courses with UMSON while in your ADN program.

4. You are not able to formally start the program until you complete the confirmation process.
5. You will be required to send multiple transcripts along the way to show progression.
6. If you need to defer your matriculation term, you must contact the UMSON advisor to make this request.
7. You may matriculate with your RN license pending but you must provide proof of earning it prior to the end of your first official term at UMSON.

Failure to complete these steps will prevent you from completing the RN-BSN program!

UMSON Advisor: Kelly Pawlak, Assistant Director of Admissions kpawlak@umaryland.edu
