MC MONTGOMERY COLLEGE

Memorandum

To: Montgomery College Community

From: Adam Reid, Director of Public Safety, Health and Emergency Management

Subject: **Walk-ins Welcome at Germantown Campus Vaccination Site**

Date: May 4, 2021

Good Afternoon:

Montgomery College strongly encourages everyone to get a COVID-19 vaccine. The Centers for Disease Control and Prevention (CDC) recommends that anyone eligible get a vaccine as soon as possible. Widespread vaccination is a critical tool to help stop the pandemic.

This week, the vaccination site at Montgomery College's Germantown Campus began accepting walk-up appointments. Those community members who do not have a scheduled appointment can come to the Germantown Campus and receive a vaccine. Pre-registering for a scheduled appointment is still encouraged.

If you are coming to Campus to receive your vaccine, use RT 118/Germantown Road to enter at Observation Drive. For those who are not driving, Ride On offers a shuttle between the Shady Grove Metro Station and the Montgomery College-Germantown Campus vaccination site.

As a reminder, Montgomery College is hosting the Vaccination Site, but is not involved in the process of registering to receive the vaccine. If you wish to schedule an appointment time, pre-registration is required at the county website or state website.

Due to the Vaccination Site being on the Germantown Campus, College employees and students are strongly advised to enter and exit the Campus for college business via Middlebrook Road and to park in lot 4. Once on Middlebrook, you will make only right turns. This will allow you to avoid delays.

The check-in location on campus for employees and students with College business, not to be vaccinated, is located in the Welcome Center site on the ground floor of the Student Affairs and Science Building (SA).
