CONNECT MONTGOMERY
SUPPORTS DIGITAL EQUITY

Digital Equity means that everyone has access to the internet and a device and skills to use it.

We want every Montgomery County resident to have reliable internet, a computer, and training. That's why:

Montgomery County Public Schools (MCPS) is providing students and families with access to Chromebooks and WiFi hotspots.

The Office of Broadband Programs can help you connect to the internet at an affordable price, find indoor and outdoor public WiFi, and provide **seniors with technology training programs.**

The County is working to bring broadband to **rural homes and businesses** and to offer discounted computer programs later this year.
