

Chemical and Biological Science  
 COVID-19 Continuity of Instruction Plan  
 Updated and submitted 3/17/2020

1. Chemical and Biological Sciences is well positioned to transition to remote instruction since nearly half of our courses are already online. The majority of our courses have associated laboratories designed to establish a foundation of content knowledge and to practice the skills necessary to do scientific research. Creative methods of delivery are being developed for laboratory courses and are discussed below. Completion of lecture content is nearly complete with the most frequent method of delivery being that of Blackboard. Most faculty had previously been trained to deliver content in Blackboard. Many faculty opted to take refresher workshops offered through Elite or arranged through CBS faculty leaders in the delivery of online content.
2. We have many chemistry, biology, and biotechnology faculty members who are expert at online course delivery and who have agreed to be leads for the transition to remote instruction:

| Course             | Faculty Leads                        | Email  |
|--------------------|--------------------------------------|--|
| BIOL 105           | <b>Tori Schneider</b>                | victoria.schneider@montgomerycollege.edu           |
| BIOL 106           | <b>Tori Schneider</b>                | victoria.schneider@montgomerycollege.edu           |
| BIOL 130           | <b>Janet Norcross</b>                | janet.norcross@montgomerycollege.edu               |
| BIOL 131           | <b>Alex Micich</b>                   | alex.micich@montgomerycollege.edu                  |
| BIOL 150           | <b>Antonio Del Castillo-Olivares</b> | antonio.delcastillo-olivares@montgomerycollege.edu |
| BIOL 202           | <b>Steve Tsang</b>                   | hsinyi.tsang@montgomerycollege.edu                 |
| BIOL 212/L         | <b>Leah Allen</b>                    | leah.allen@montgomerycollege.edu                   |
| BIOL 213/L         | <b>Leah Allen</b>                    | leah.allen@montgomerycollege.edu                   |
| BIOL 226           | <b>Jeff Chyatte</b>                  | jeff.chyatte@montgomerycollege.edu                 |
| BIOL 228           | <b>Alex Micich</b>                   | alex.micich@montgomerycollege.edu                  |
|                    |                                      |  |
| CHEM 099           | <b>Fotis Nifiatis</b>                | fotis.nifiatis@montgomerycollege.edu               |
|                    | <b>Thomas Chen</b>                   | thomas.chen@montgomerycollege.edu                  |
| CHEM 109           | <b>Craig Benson</b>                  | craig.benson@montgomerycollege.edu                 |
| CHEM 131           | <b>Fotis Nifiatis</b>                | fotis.nifiatis@montgomerycollege.edu               |
|                    |                                      |  |
| BIOT – All courses | <b>Lori Kelman</b>                   | lori.kelman@montgomerycollege.edu                  |

In addition, for each of our courses, there is a standing workgroup of faculty who act as a resource for that course. In most of these course workgroups there is at least one member who has extensive experience with remote instruction. There is also at least one member on each campus. We will prioritize communication to faculty to ensure that everyone knows who to contact for content related questions relevant to the transitioning of their course(s). Several leads have already been proactive in reaching out to all faculty teaching a section of their assigned course.

Most of our courses already have Bb communities and in some instances these communities make online resources available to community members. Our faculty will work to expand these already existing

collections of resources so that there is more that is relevant to remote instruction. We will also make sure instructors know about these resources and how they can gain access. Faculty were informed of the Elite remote teaching resource website (<https://www.montgomerycollege.edu/offices/elite/emergency-remote-teaching-guidelines.html>). Faculty requiring remote teaching instructional materials, e.g. laptops, headsets, webcam, or stylus have had the opportunity to pick up resources (or be reimbursed for purchases up to \$100). Faculty creatively discussed mechanisms to develop and offer appropriate laboratory instruction during this period of remote teaching. This included:

- The production of a short video of a lab common to all course sections being carried out by a faculty member. The video will be distributed to all course faculty.
- The creation of pre-generated class data sets for morphological unknowns and chemical unknowns to be provided to students. This would ensure that quantitative instruction will continue.
- Potentially change the timing of labs (frontload lecture content now and concentrate on laboratory content later). This only works in the short term and for limited courses owing to facility space.
- Modifying labs to maximize content knowledge and minimize skill practice was suggested for non-major general education courses.

### 3. Potential Barriers/Issues:

- Maintaining quality of the laboratory experience is an issue. In most instances, the use of equipment and the need to practice skills cannot be replicated by current technology. The exceptions are BIOL 131 Human Body and 212/213 Anatomy & Physiology I & II developed by Drs. Alex Micich and Leah Allen, respectively.
- Part-time faculty may not have the same level of access to resources that can aid them in adjusting their course delivery. As many of these faculty have full-time jobs in addition to their work at MC, they will also not have the same amount of time available to them. It is important to note that resources (Blackboard community sites, websites, online course materials including OER resources) have been shared already with part-time faculty.
- Ensuring that faculty appropriately adjust their syllabi to reflect necessary course modifications may prove to be a challenge.
- Test security remains a faculty concern. If we cannot require students to come to campus, then how can we ensure that the student is doing his or her own exam? Using ProctorU has been suggested but not all students have the technology at home to use this option and faculty were largely unaware that this option exists.
- Accessibility and ensuring that students have their DSS accommodations needs met is an issue.

**CBS Workgroups  
Remote Teaching  
Workgroups**

Workgroups have been established from the list of campus course coordinators. Coordinators oversee course offerings including the tasks below. Additionally, for each department, an online lead has been identified by the department chair. Although multiple faculty may teach online, the thought was to have a designated “buddy” to turn to if faculty encountered an online concern or problem. The online “buddy” by department are: CBS Germantown – **Kiersten Newtoff**, Rockville Chemistry- **Craig Benson**, Rockville Biology – **Victoria Schneider**, CBS TPSS – **Alex Micich**. They will be in contact with each other to discuss and document issues that may arise.

**Workgroup Tasks for the Rest of the Semester:**

1. Create Communication Strategy
  - a. Determine how to communicate with the rest of the workgroup
  - b. Create a communication strategy for:
    - i. All course instructors (including online) particularly during this time of remote teaching and for the remainder of the semester.
    - ii. To inform course faculty of answers to posed questions
2. Create and Maintain Common Course Outline to include:
  - a. Required Textbook
  - b. Required Technology
  - c. Common Final & Review (if applicable)
  - d. General Education course signature assignments
  - e. Course Topics
3. Identify a clear student success strategy to ensure student engagement and success
4. Develop and suggest language for faculty to incorporate into their syllabi that addresses modifications that may have resulted with the move to remote teaching.
5. Recommend a plan to assess students during this period of remote teaching
6. Ensure that General Education course assessment and signature assignments are completed
7. Work with Learning Centers on each campus to keep them informed of changes
8. Work with the library to keep course pages updated

| <b>Course</b>   | <b>TPSS Lead</b>   | <b>RV Lead</b>         | <b>GT Lead</b>   | <b>Additional Members</b> |
|-----------------|--------------------|------------------------|------------------|---------------------------|
| <b>BIOL 101</b> | Alessandra Sagasti | Vedham Karpakakunjaram | James Smith      |                           |
| <b>BIOL 105</b> | Sean Cooney        | Tori Schneider         | Kiersten Newtoff |                           |
| <b>BIOL 106</b> | Sean Cooney        | Tori Schneider         | Kiersten Newtoff |                           |
| <b>BIOL 111</b> |                    | Esat Attikan           |                  |                           |
| <b>BIOL 114</b> |                    | Shawn Lester           |                  |                           |

| <b>CHEM 150</b>   | Solomon Teklai     |                      |                     |                               |
| <b>CHEM 203</b>   | Cory Newman        | Rachel Ndongye       | Don Newlin          |                               |
| <b>CHEM 204</b>   | Adel Halli         | Sripriya Seetharaman | Don Newlin          |                               |
| <b>CHEM 272</b>   |                    | Thomas Chen          |                     |                               |
|                   |                    |                      |                     |                               |
| <b>BIOT - All</b> |                    |                      | Lori Kelman         |                               |

CBS is prepared to move forward with online or other forms of remote instruction beginning the 23<sup>rd</sup> of March. Faculty collegiality is high and all are motivated to make remote instruction meaningful to our students.
