Find Your Librarian

Each campus has a librarian who specializes in providing research and instructional support for specific subject areas. Find your librarian at <https://library.montgomerycollege.edu/research/find-your-librarian.html>.

All services can be accessed from the Blackboard course menu.

Course Reserves

Our course reserves services connects students with course-related materials held by the library. When students click the Library Course Reserves link, they will see any course-related materials that you have requested be held on reserve at the library, including the course textbook. Faculty can use the same link to request that course-related items be placed on reserve for your students, such as textbooks, books, journal articles, videos, book chapters, and more.

Library Research Help

Our library course pages, research guides, and research toolkits are online guides built by MC librarians to help your students find and use library resources for a specific class or on a specific academic subject. These guides are a great way to help your students learn to be independent researchers. Clicking the Library Research Help link will take you and your students into the most relevant guide the library has for your class.

Library Instructional Content

Our instructional content allows you to pull information literacy learning objects into your Blackboard course. We offer tutorials, videos, and quizzes on a wide variety of information literacy concepts that are crucial to your students' success. Click the For Faculty: Embed Library Instructional Content link to see the learning objects and learn how to embed them in your Blackboard course in the location that would most benefit your students.
