# DATA-INFORMED DECISION MAKING SPEAKER SERIES

Montgomery College launched its Data Asset Management Plan (DAMP) in early Fiscal Year 2022. An important element of the plan is to enhance data literacy through training and education for faculty, staff, and students. Data is everywhere. The large quantities of data that Montgomery College collects supports administrative operations, instructional delivery, and student success, which all serve as pillars to the College's mission and everything we do. With the challenges of the coronavirus (COVID-19) pandemic, we have needed accurate and timely data more than ever. However, many of our colleagues have always used data to make informed decisions. This Data-Informed Decision Making Speaker Series will highlight some of them and is a part of Analytics & Insights' effort to inform the college-wide community about how departments within the College currently use data to make decisions. All Spring 2022 talks are virtual and scheduled for Tuesdays at 3pm between February 1 – March 1. Everyone is welcomed to attend.

**Arlene Blaylock, PhD**  
**Director of Institutional Research and Effectiveness**

*Presents on:*

**Successfully Navigating the Office of Institutional Research and Effectiveness**

**February 1, 2022**

**3:00pm–4:00pm**

**Workday Registration**
